

miniShop

miniShop is a fully functioning ecommerce shopping cart that is designed for users with fewer than 20 products. If your need is greater than this, please check out our eShop. miniShop is easy to manage and maintain and comes complete with unlimited hosting. Some of miniShop's features:

- Fully XHTML compliant
- Uses "buy now" or "add to cart" buttons, so you can use a payment processor that meets your needs - eg. PayPal or some other company that is available in your geographical area.
- "Show cart" buttons coded to only show if "add to cart" buttons are being used.
- Define the order of products
- Category support
- Show/hide full details page
- Category access privileges
- Fully coded for language support
- Easy-to-use admin interface and simple configuration area
- Turn your product details page into a "mini sales page" with the simple-to-use editor, and add as many product images as you like throughout the description

miniShop costs just £195.00 setup and £10.00/month. The cost includes customising with your logo and the inclusion of your first 5 products. Order miniShop today.
